

DSA - axial force limiter: introduction

- High axial stiffness.
- Compact.
- Immediate interruption of power in case of overload.
- Continuous adjustment of the intervention force.
- Possibility of mechanical limit to prevent the slipping of the central pin after disengagement.
- Force range: 25-4.700 N.

DIMENSIONS AND TECHNICAL DETAILS

Size	Force [N]			A	B h7	D	G	G1	M	N h7	P	Q	R	T	V	Z	Weight [Kg]

PRX - inductive proximity sensor: technical data

- Standard version with brass cover with protection IP67 DIN 40050.
- Electric contact 5 ÷ 24 VCC and working frequency 2000 Hz.
- Operating temperature from -20°C to +70°C.
- Output: NPN (N.O. - N.C.); PNP (N.O. - N.C.).
- Intervention distance: max 1 mm.
- Cable length: 2 meter (3x0,2).

Weight: 50g

DSA - axial force limiter: introduction

- ⊙ Axially backlash free.
- ⊙ Protection in both tension and compression.
- ⊙ Free movement in tension and compression after release.
- ⊙ Automatic re-engagement in the exact position of disengagement.
- ⊙ Innovative calibration system by "H dimension" for an immediate calibration of the device.
- ⊙ Made of steel fully turned with special high mechanical strength.
- ⊙ No maintenance for high reliability in the time.

ON REQUEST

- ⊙ Complete with drive rods and rod ends.
- ⊙ Sensor or switch mounted in axial or radial position.
- ⊙ Possibility of customization for specific applications.
- ⊙ Possibility of surface treatments for corrosion-specific needs.

Safety coupling with linear limitation of force. Releasing both in compressive and tension once it reaches the calibration force. The setting force can be adjusted by turning the adjuster nut onto the springs and re-engagement is automatic. Possibility of connecting linear motion also very distant from each other.

MAIN APPLICATIONS

- ⊙ Shaft mounted gearboxes.
- ⊙ Cam/Eccentric movements.
- ⊙ Transactions structured for pushers and slides.
- ⊙ Crank mechanism.

ADVANTAGES AND BENEFITS

- ⊙ Protect shaft mounted gearboxes overloads on the transmission.
- ⊙ Protect slides or other moving parts from accidental shock or collision limit.
- ⊙ Protect movements typically jams or improperly placements.
- ⊙ Protect the final product from crushing or deformation.

ASSEMBLY EXAMPLES

EM - electromechanical switch: technical data

- Protection level IP57 DIN 40050.
- Adjustment of the lever end position possible.
- Die-cast aluminium box.
- Operation temperature range from -10°C to +85°C.
- Three different options of voltage input with 1 or 2 contacts available.
- Initial stroke 0,7 mm, Extra stroke: $4 \div 8$ mm depending on setting (possible in a range of 6 mm).

Weight: 350g

PRX - inductive proximity sensor: technical data

- Standard version: Brass cover with protection level IP67 DIN 40050.
- Electric contact: $5 \div 24$ VdC. - Frequency: 2000 Hz.
- Output: NPN (N.O.-N.C.) – PNP (N.O.-N.C.).
- Operating distance: max 1 mm.
- Cable length: 2 m (3x0,2).

Weight: 50g
